

You Need

- Play money:
10x5¢, 10x10¢, 20x20¢, 10x50¢, 10x\$1, 5x\$2
- Two [2] boards: Money Charts A & Money Charts B

Your Task

Money Charts works like this:

1. Use Chart A:

- Place coins correctly on the pictures.
- Calculate the money for each empty square.
- Show answers with the smallest number of coins.

+		60¢	
\$1		\$1.60	

To find this money, add the money on the left and the money above. Same for every unshaded square.

2. Use Chart B:

- Place coins correctly on the money squares.
- Calculate the money for each empty square.
- Show answers with the smallest number of coins.
