

# COUNTING FRAMES

These four (4) counting frames can be used in several ways. As they are but use a sheet of paper across them to show only 2 rows for counting by twos, or 3 rows for counting by threes or ...

Or cut them into strips of two (2) frames, using the first strip to count, then asking questions like: "What if we put another two frames on the end to make the line longer?"

Or, if age or experience suggest it, begin with one (1) frame and cover and count on that up to 5 or 10 or 15 or 20 or 25.
